

## *A Chambers Plan can Help YOU Connect the Dots!*

*A Chambers of Commerce Group Insurance Plan can give you rate stability, innovative offerings and unbeatable guarantees!*

The sole purpose of the Chambers Plan is to provide comprehensive and affordable group benefits to participating Chamber of Commerce members and their employees. In addition to providing plan participants with reliable coverage, the Chambers Plan can support your employees in so many other ways! Most importantly, it will help keep your employees healthy! The easy to access web portal ([www.my-benefits.ca](http://www.my-benefits.ca)) gives Plan participants admission to reliable health tools and services. Not to mention you can make all your health and dental claims with the click of a button or even right from your smart phone application. It can also help an employee with a medical second opinion. Best Doctors is a service included in every plan and it can bring greater certainty to your diagnosis and assist with a treatment plan. A Chambers Plan can also help you manage your business! The Business Assistance Service (BAS) gives owners access to Legal, Accounting and Specialized Human Resource services and advice every year.

With built-in rate stability, you won't have to shop around every year for a new benefit plan. The Chamber Plan has over 25,000 companies participating in the program across Canada. So if one of your employees files a large claim, it's spread over a huge pool and you're guaranteed more stable rates from year to year.

*Thank you for choosing to be a member of your local Chamber of Commerce!*
